

CHANDELIERS FROM BOHEMIA

COMPANY PROFILE

Jablonec nad Nisou

Co-founders of ArtGlass

Prague

ABOUT US

The company ArtGlass was established by three co-founders in 1993 and for more than 20 years of its existence it has been one of the leading manufacturers of traditional Czech crystal lightings and chandeliers.

The company is based in Jablonec nad Nisou, a picturesque town in the north of the Czech Republic. The town has a long tradition of glass making and glass processing and is called "the city of glass and jewelry".

Bohemia is renowned for having produced beautiful crystal lighting fixtures for more than 500 years. We are very proud of this tradition and we make every effort to ensure that our lighting fixtures, with their accurate manufacture and unique design, figure among the best products worldwide.

ABOUT US

Our company's products are the result of the careful work of a hundred employees. Due to the increasing production volume and the use of new, modern and environmentally friendly technologies, in 2008 we moved part of our production to new premises. The original headquarters of the company, at Černá Studnice, are now home to the custom metal workshop, thanks to which we are able to design and manufacture all the metal structures and metal components of our lighting fixtures at premium quality.

A number of processes are carried out at the company headquarters in Jablonec nad Nisou, including, in addition to management: completion of trimmings, final assembly of lighting fixtures, packing and shipping. We continue to invest in the further development of our company and 2016 will see the construction of a new structure which will house a luxury showroom, where even larger lighting fixtures will be on display. The showroom will allow customers to experience the elaborate details of our chandeliers, the different types of surface finishes, individual glass elements and the range of lighting fixtures on display and see the impressive breathtaking effect of our products for themselves.

OUR OFFER RESIDENTIAL LIGHTING

ArtGlass offers more than a thousand unique lighting products, and new designs are made every day. Our selection consists mainly of traditional lighting fixtures with glass or metal arms, basket and ceiling lights, lighting fixtures with cast metal arms, traditional Marie Therese chandeliers and contemporary crystal lighting fixtures. Every single lighting fixture from the ArtGlass collection forms a perfect whole, giving the perfect decorative touch to traditional or modern interiors.

CUSTOM-MADE CHANDELIERS

Our main focus at the moment is on custom-made chandeliers. Thanks to our exclusive experience in the field and our flexible production facilities, we can create unique or large-scale lighting to our own designs or to yours. Our experienced team of designers can accommodate all the needs and requirements our customers may have. Our highly skilled craftsmen ensure high standards, top quality and original lighting products. 3D sketches created using SolidWorks software enable our customers to see how their lighting will look and to fine tune the details.

Our team of designers has successfully completed hundreds of projects. This is testament to the impressive range of design and manufacturing capabilities of our company, which enable us to design lighting in perfect synchrony with our customers' interiors, be they traditional or contemporary, taking into account the requirements of different cultures.

CHANDELIERS FROM BOHEMIA

A GLIMPSE OF OUR PROJECTS HOTEL RŮŽE

The Růže project, finished in 2001, is just one of the many successful projects we have completed. In the historical center of Český Krumlov, a UNESCO World Heritage Site, the former 16th-century Jesuit college has been converted into a beautiful boutique hotel, Hotel Růže. Chandeliers with metal arms, specially tailored by ArtGlass to fit the interiors of the Hotel Růže, provide unique decoration for the hotel's conference rooms: the Jesuit and Hall and the Banquet Hall. The hotel rooms are also decorated with ArtGlass lighting fixtures.

GLIMPSE OF OUR PROJECTS

SAGAN CASTLE

Another successful project was Sagan Castle in Poland, which has a rich history that dates back to the 13th century. In 2013 we furnished Sagan Castle with traditional Marie Therese chandeliers and ArtGlass lighting fixtures - they adorn the baroque interior of the castle beautifully and accentuate the exquisite architecture of that period.

CHANDELIERS FROM BOHEMIA

SHOOTING RANGE PROJECT TÁBOR

The Neo-Renaissance Shooting Range Project in Tábor is another interesting project. Since its construction in 1895, the Renaissance Shooting Range has been a prestigious social venue. The beautiful hall has hosted various social events and concerts. In 2003, the whole area was proclaimed a national heritage site of the Czech Republic. The beautiful Renaissance interior of the shooting range is furnished with unique ArtGlass lighting fixtures. The golden basket lights with milk glass lamps dominate the grand staircases and walkways of the shooting range. ArtGlass worked on this special project in 2008.

GLIMPSE OF OUR PROJECTS

ODESSA RESIDENCE PROJECT

Our portfolio of projects includes a private residence in Odessa in Ukraine. In 2013, we fitted the residence with a combination of modern and traditional lighting. The rooms are decorated with custom ceiling or wall fixtures, including a beautiful Marie Therese chandelier and cast ceiling and wall lights. A huge custom-made crystal spiral fixture sets off the internal spiral staircase perfectly.

RESIDENCE PROJECT PRAGUE

Last but not least is an installation we completed in a private home in Prague in 2016. The lighting fixture designed for the entrance hall was inspired by the Wiener Secession style, and consists of a basket made of brass sheets, profiles and castings with eight lanterns around the perimeter, richly hung with glass tubes. The fixtures for the other rooms in the home follow a similar design so that all the lights complement each other nicely while respecting the customer's requirements.

The project also included crystal sinks, cut with great accuracy to the design of our lead designer. The whole installation is complemented by four all glass design tables made from blown glass. This project is a stunning example of ability to create unique lighting fixtures in line with our customer's expectations, and also to collaborate with other leading Czech glassworks and glassblowers to create additional complementary glass products.

OUR GOAL

Our goal is to create unique and top-quality lighting fixtures, which can take their place as eye-catching accessories in your interiors. Our top priority is customer satisfaction. We place great importance on friendly customer service, comprehensive consultation and a tailored approach to account for each customer's needs and requirements. This approach is deeply enmeshed with an emphasis on quality and respect of the customer's deadlines. The result of this unique approach means that our lighting fixtures are not only created to fully satisfy our customers' design requirements, but, thanks to our accurate and thoroughly monitored manufacturing processes, they are also a pleasure to use and their longevity is guaranteed.

OUR MISSION

Working with glass requires great imagination, attention to detail, precision and, above all, passion. Glass offers endless possibilities in processing and imbues individual lighting fixtures with unmistakable charm and originality. Light refraction and color reflections create a breathtaking spectacle that never gets old and is a constant pleasure to behold. Let yourself be enthralled by our lighting fixtures, carefully designed so as to provide an unforgettable sight from any angle, in both natural and artificial light. We are fortunate that our work is more a calling than anything else. As the heirs to over 500 years of the Czech tradition of glass processing, our every effort goes towards maintaining the international repute of our crystal chandeliers. As our customer, you can either browse our vast collection of lighting fixtures to find your perfect match or let us, masters of our craft, suggest a unique lighting solution to fit your requirements.

OUR PARTNERS

Over time, we have expanded into many foreign markets and continuing to do so remains a priority of our company. Good quality and reliable relationships with our partners are very important to us and we are constantly working on building and strengthening these relationships. At present, we have business partners in the following countries: Armenia, Bolivia, Great Britain, Hungary, Lithuania, Malaysia, Moldova, Myanmar, Poland, South Africa, Romania, Russia, Kazakhstan, Ukraine, Vietnam, Thailand and others. Further information and contact details of our partners can be found at www.artglass.cz.

EXHIBITIONS

Maintaining visibility by displaying our products and expansion into other markets are very important to us, which is why each year we participate in exhibitions around the world. ArtGlass regularly exhibits at Light and Building in Frankfurt am Main, Moscow Interlight in Russia, Interior Mebel and Comfort House in Kiev and Light in Warsaw. As part of our plan to expand into new markets, we have also exhibited at a number of venues further afield, including Biel Light + Building 2015 in Buenos Aires, Vietbuild Home 2015 in Vietnam, Hotelex Shanghai 2016 in China and Architect'16 in Thailand.

CERTIFICATES

At ArtGlass we place great emphasis on the quality of manufactured lighting fixtures. We use components from leading Czech and European manufacturers in our lighting fixtures and we also work alongside a renowned local glassworks. Each component and then each finished product are subjected to careful controls during the manufacturing process. At the end of the process, the products are encased in suitable packaging that ensures our lighting fixtures can be transported safely to anywhere in the world. The following certificates guarantee the quality and safety of our products. Our lighting fixtures are tested by the Czech Electrotechnical Testing Institute (EZU) and are certified according to European standards. All our lighting fixtures bear certificates from the IECEE CB scheme and EŠČ certificates. We are also issued certificates based on our CB certificate for Ukraine and for the Customs Union of Russia, Belarus, Kazakhstan and Thailand. In order to maintain our EŠČ certificate, our lighting fixtures are continuously reassessed. Our pendant lights are also certified according to UL standards, which allows us to sell these lightings in the USA, where the UL standard is required.

INSTALLATION

Our team will maintain contact with you during the construction of your building. We will send you construction readiness requirements in advance, such as the weight of the lighting fixtures, the electricity input requirements, etc. Fixture assembly is carried out by our experienced team of assemblers for both domestic and international projects.
